**Introduction to the Crisi Wartegg System:
A New Methodology for the Clinical Use of the Wartegg Drawing
Completion Test**

Training Overview:

This workshop introduces the Crisi Wartegg System (CWS), a new methodology for the clinical use of the Wartegg Drawing Completion Test (WDCT). The WDCT is a projective drawing technique that can be completed in 5-10 minutes and is appropriate for children, adolescents, and adults. It is easy to administer and not overwhelming for clients to complete. The WDCT is not well known in the United States; however, a recent meta-analysis (Gonnerod & Gonnerod, 2011) attests to its validity in assessing personality and psychopathology. It was also recently recognized as a valid performance-based personality test that can be used for certification in Therapeutic Assessment.

Two Dates to choose from:

Series 1: August 27-29, Denver, Colorado.

Presenter: Jacob A. Palm, Ph.D., US Representative, Istituto Italiano Wartegg
Co-sponsored by the Colorado Assessment Society
